

Idea : To build a portal for daycare schools to get in touch with their kids class students parents.

Click on any class from classes drop down → It should navigate to page where it display sign In or Sign Up to view the students/parents details and chat

SIGN IN or Create an account to Sign In

Username

Password

Sign In

When Click on Create an Account to Sign In The Sign Up form should display as below.

First Name:

Last Name:

Email:

Confirm Email:

Password:

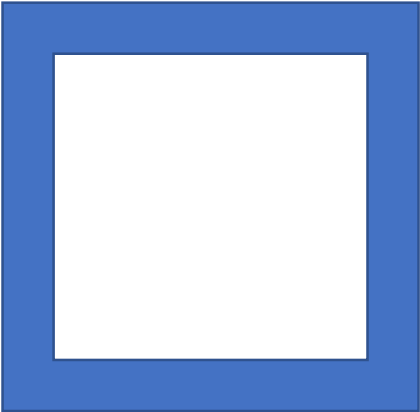

Confirm Password:

Sign Up

Once login the page should display the student/parent details which ever class is selected.

Chat/Message

Student Name	Parent Name
Student 1	Parent1
Student 2	Parent2

I am thinking like message to individuals/ group and they can view it when they login to portal.

Not sure things: whether to have the sign in on the main page or when the user clicks on the class from classes drop down.
